24 HOURS IN CYBERSPACE

Painting on the Walls of the Digital Cave

CYBERSPACE. Intangible electronic space. The term was first used in a science fiction novel but has since become reality. And Stout students became a part of this new frontier recently when they participated in "24 Hours in Cyberspace," a worldwide project to capture electronic images of the impact of technology on how people live.

Stout students were in good company with more than 100 of the world's top photojournalists participating. Thousands of students from all over the world shot pictures, wrote articles and crafted their own home pages for the Cyberspace "Student Underground."

The project's headquarters site had a direct link to Stout's Cyber24 page which listed all students as they submitted pages. Pages submitted to university sites were posted as they came in.

Susan Hunt, Stout professor of graphic design, said Stout students had only two weeks to create their entries. "I'm especially proud of what the students were able to accomplish in that short time," Hunt said, noting that it was also during those two weeks that the entire Stout computer lab was moved to a new location.

Hunt admitted that at first some of the students were intimidated by the computer Internet. "It's not just people over 30 who may feel they're being left behind," Hunt said. "It's changing so fast, it's hard for anyone to keep up. It's a tremendous transition phase."

Darrel Austin, a junior in graphic design, had just completed a co-op with 3M in which he used the computer extensively so the Internet was not new to him. His team's project was to write

material comparing the Internet to other mass media — radio, TV and newspapers. Austin likened it to the era when TV was a new medium, and advertisers were eager to use it. "It's a great worldwide market," he said. "It has created a whole new field of design."

Austin was fortunate in that he had experience with Internet. But those students who didn't, at least got their feet wet. "It was like a jump into a cold lake," he said. "It woke them up to the Internet."

Like Austin, Garrick VanBuren had previous experience with Internet, and he was eager to tackle the project of making his own page on the World Wide Web. VanBuren's project was to show the difference between traditional ways of finding information, for example encyclopedias, books and periodicals, and the Internet.

"When you search for information on the Internet, you get up-to-the-minute information," VanBuren said, citing stock quotes as an example. "It's as quick as your thoughts are," he said. He noted that even weekly periodicals or daily newspapers can be out of date by the time they are printed. VanBuren said he now uses the Internet to do research for all his school papers. Hunt said she hopes other students' exposure to the Internet via this project will make them aware of the possibilities as well.

Hunt said she also sees the project in terms of producing a time capsule, noting that a permanent World Wide Web site is to be established, and a book and CD-ROM will follow. Readers can access the 24 Hours in Cyberspace site at:

<http://www.cyber24.com>

"It's historic," Hunt said, "and exciting. I'm happy Stout was able to be a part of it."

"It's not just people over 30 who may feel they're being left behind. It's changing so fast, it's hard for anyone to keep up."

Susan Hunt

"It was like a jump into a cold lake. It woke them up to the Internet."

Equipment used for the Cyber 24 project was funded by grants from the Stout University Foundation and the Nakatani Center.

The new "weekend warriors"

Weekend courses at Fort McCoy serve those who work full time

A-TEN-shun! Fall in! Today, students, our lecture is on task analysis. Sound like a military base? Or a college classroom? It's both.

UW-Stout is offering a new "college weekend opportunity" at Wisconsin's Fort McCoy military base. In two years, participants can graduate with a master of science degree in training and development.

"Stout's master's degree in training and development prepares training professionals to meet the technical training needs of business and industry," Julie Furst-Bowe, program director, noted.

Furst-Bowe said that graduates of the program will be able to analyze training and development needs; design, develop, deliver and evaluate training programs and materials; manage and coordinate training efforts; and develop training and development competencies in managers and supervisors.

She said that organizations spend "billions of dollars" each year on employee training and development. "Companies need people who are responsible for training employees to do their jobs effectively," Furst-Bowe said.

UW-Stout faculty members and trainers from business and industry, such as Miller Brewing and Phillips Plastics, make up the teaching staff.

Steven Schlough, of UW-Stout's communication, education and training department, taught for the third time at Fort McCoy last fall. "I enjoy it because most of the students are employed full time and have background knowledge. The discussions are great," Schlough said he usually gets information to bring back to UW-Stout as well.

He doesn't mind the weekend trips to Fort McCoy, some 100 miles away. "To be competitive in today's market, public schools like Stout need to be flexible."

Jim Breen, of Phillips Plastics, and Joel Benkowski, of Miller Brewing, team-taught the first class offered for the fall semester. "It was a unique synergy," Breen said, "because most students had industry backgrounds and there was so much give and take. There was a wealth of knowledge there already." Breen said it was also rewarding for him personally to get the military training perspective "which has been working for years" and bring that back to Phillips. "It was enriching for everyone involved," he said.

Leon "Carl" Stough, military instructor at Fort McCoy, was a student in that class. "I feel it's an outstanding program," Stough said. "It's an exceptionally well put-together weekend program for people who work full

time." Stough said also that he was impressed with the training staff. "They were so knowledgeable and so accessible," he said. "They were even willing to give their home phone numbers if we had questions." Stough noted further that he found the college weekend format to be an "economical program."

Stough said he had looked at several programs which would allow him to obtain a master's degree while still in the military full time and that UW-Stout's program was very economical compared to many others.

Trudy Kroeger, manager of human resources at Jerome Foods in Barron, is earning her master's degree through the college weekend program while remaining employed full time at Jeromes. "The program is ideal for me," Kroeger said. "I want to earn my master's degree, but I need to work full time." Kroeger said she looked at programs at several colleges, but she likes the flexibility UW-Stout provides.

UW-Stout's weekend college opportunity enables individuals like Kroeger and Stough to remain employed full time while earning master's degrees—with ease. Or is that "at ease"?

"It was a unique synergy because most students had industry backgrounds and there was so much give and take. There was a wealth of knowledge there already."

Jim Breen

Lyall gives praise

UW System president recognizes manufacturing partnership

UW-Stout was among those schools recognized by UW System President Katharine Lyall at the fall Board of Regents meeting.

"I want to recognize the extraordinary fruits of a partnership among five institutions of the UW System, the Wisconsin Technical College System, the State Department of Development, private industry and two of Wisconsin's private colleges," Lyall said.

She noted that UW-Extension Chancellor Don Hanna and Dwight York, director of WTCS, led the formation of the Wisconsin Center of Manufacturing and Productivity, of which UW-Stout is a part. The non-profit corporation was formed to deliver technical assistance to Wisconsin's small- and medium-sized businesses.

In addition to UW-Stout, other participating UW institutions are UW-Madison, UW-Milwaukee, UW-Platteville and UW-Extension.

Each center in the network works as a partnership of federal, state and local government, industry and educational institutions. Lyall said that the underlying philosophy of the center is to extend to manufacturing businesses the kind of technical assistance that

has been offered for many years by universities to agriculture.

"I like to think of it as a modern-day extension of the Wisconsin Idea," Lyall said, "to assist Wisconsin firms in creating jobs and becoming competitive in national and international markets."

The Manufacturing Extension Partnership is supported by the Department of Commerce with a grant of \$15 million over five years. A number of partners, including five UW institutions, are matching financial support for 1996.

"This is an extraordinary milestone in statewide partnering with university outreach activity," Lyall said.

"I like to think of it as a modern-day extension of the Wisconsin Idea, to assist Wisconsin firms in creating jobs and becoming competitive in national and international markets."

Lyall

Continued co-op success

Salaries have increased along with demand for co-op students

Seven-fold? Try 70-fold. Since its inception in 1982, UW-Stout's cooperative education program has increased nearly that much. Eight students were employed at eight companies when the program started, Howard Slinden, coordinator of cooperative education, said. Slinden's annual report for 1994-95 notes that 541 students were employed at 321 companies.

Student salaries have, of course, increased too, but even just in the last year, Slinden reports that student salaries have increased "significantly." Co-op students in the School of Liberal Studies applied math program, the highest paid area, averaged \$12.40 an hour during their co-op employment. Other high-paying areas were in the School of Industry and Technology with product development students averaging \$11.28 an hour and packaging students, \$10.94.

"Salaries have increased along with demand for co-op students," Slinden said. He noted that there were three jobs for every packaging student.

"Companies want part-time employees with enthusiasm and fresh ideas," Slinden said, "and Stout students offer that."

Slinden said companies also want co-op students because it gives them a pool of job applicants to choose from. "You can get a pretty good idea of an applicant's performance and potential after they've worked for you for four months," he noted.

Companies from A to Z, from all over the country, participate in the program—from Amana Refrigeration to Zaug's Food Service

Inc. Cray Research, in Chippewa Falls, Wis.; IBM and Rollerblade, of Minnesota; and Marriot hotels all over the country are just a few of the well-known companies that employ UW-Stout students. "Target has been pleased with Stout students and has hired a number of them," Slinden said.

Each year cooperative education "Students of the Year" are chosen from various fields. Dana L. Pischke, industrial technology-packaging, was chosen in that area. "Cooperative education is a program that brings out the best in people, as it did in me!" she said.

"This whole experience built not only on my packaging, engineering, organization and communication skills, but built my confidence as an individual and a professional," Dana added.

Students, employers and the university all benefit. "The cooperative education program at Stout is an excellent example of a working partnership between employers and a university," Slinden said. "UW-Stout has long recognized the value of practical work experience to strengthen university programs."

"Companies want part-time employees with enthusiasm and fresh ideas, and Stout students offer that."

Slinden

Higher education continues to face exciting, demanding challenges which provide excellent opportunities to address issues and problems creatively and positively. We are doing exactly that at UW-Stout as this issue of the Outlook will illustrate.

Just as industry continues to undergo massive restructuring, we too have refined our structure to become more efficient and effective. Our most current effort has been to consolidate our schools into three colleges, aligning some programs differently to reflect the vast changes in the professions they represent. We did not discontinue any programs nor initiate, unlike industry, any faculty layoffs in this procedure. We are simply acting as good managers in a time of tough fiscal constraints.

There are several very exciting initiatives in the technology area that reflect our constant effort to remain a leader in this area. We received, from a combination of state and private sector support, a CRAY J 916 super computer. This will be used in our technology transfer program to work with manufacturers. Importantly, use of this machine will be built into both our Applied Math and Engineering programs, providing our students a very rich academic experience. You will find the article on the Nakatani Center extremely interesting, again demonstrating our leadership role in higher education.

There are many other exciting things I could mention but you will get a good idea of what is new at UW-Stout in this publication.

I do want to extend my congratulations to the new officers of the Foundation: Bob Sorensen, President; Kim Entorf-Jedlicki, Vice President; Karen Martinson, Treasurer; and Linda Funk, Secretary. You reflect a strong, excellent Board and I look forward to working with each of you.

Chancellor's Message

Charles W. Sorensen

Regents approve new programs

Programs are extensions of Stout's special mission

Three new programs, bachelor of science degrees in graphic communications management and telecommunication systems, and a master of science degree in applied psychology, were approved by the UW System Board of Regents.

All three programs are extensions of UW-Stout's specialized mission and are unduplicated elsewhere in Wisconsin, according to Provost George DePuy.

The university has been offering studies in graphic communications management and telecommunication systems as concentrations in the industrial technology program before making them full majors, DePuy said. The applied psychology graduate program is a natural extension of the university's undergraduate degree in psychology, he added.

DePuy said that the telecommunication systems program will place a strong emphasis on the application of theory to the solution of real work problems through the intensive hands-on laboratory environment that is at

the heart of UW-Stout's teaching strategy. The program is designed to prepare telecommunications specialists who have the ability to respond aggressively to the changing needs of the marketplace. Emphasis will be placed on emerging telecommunication technologies at all levels of an organization including telephone systems, networking data communication systems, and graphic and video imaging. Graduates will also have an understanding of the contemporary work force.

The graphic communications management program is designed to prepare individuals to work and contribute in the printing and publishing industry. Graduates of the program are expected to function in management positions at a national and international level in the world economy. The program will focus on modern and emerging technologies as they affect the printing and publishing industry beyond the conventional printing processes. Required and elective courses will allow students to explore specialty and related areas of the

field. This will permit students to develop special strengths in specific industry areas or career paths such as flexography, screen printing, gravure, offset lithography, inks, electronic imaging, sales, marketing or research.

DePuy said the applied psychology master's program has a number of specific objectives: designing, conducting and evaluating behavioral research in applied settings; applying concepts of human learning, information processing, social psychology, and organizational and group dynamics to behavior change; assessing individuals' emotions and abilities for application in organizational change and career assessment; using behavioral science to work effectively with diverse groups; and understanding value systems and ethical behavior in the work place.

All three programs have been endorsed by outside consultants and will be implemented in the fall semester.

All three programs are extensions of UW-Stout's specialized mission and are unduplicated elsewhere in Wisconsin.

Academic division to reorganize

Plan aims to reduce administrative costs

UW-Stout's academic division will be reorganized, from four schools to three colleges, under a plan being submitted to the University of Wisconsin System Board of Regents. Under the plan, the university's four schools—industry and technology, liberal studies, education and human services, and human environmental sciences (*formerly home economics*)—would be reorganized into three new colleges: arts and sciences; technology, engineering and management; and human development.

Chancellor Charles W. Sorensen said there was "broad discussion" across campus in developing the plan. "Following Regents' action, I am asking for the cooperation of everyone on campus so that this can be accomplished by July 1, 1996," Sorensen said.

Provost George DePuy, who led discussion on the restructuring effort, pointed out that the change does not involve eliminating any degree programs at UW-Stout. "It does eliminate the cost of mid-level administration

and reconfigures the responsibilities of the remaining mid-level administration," he said. "The objective is to preserve the quality of instruction by cutting administrative costs."

DePuy noted that the change comes in part through budget cuts imposed by the State Legislature. "In responding to the Legislature's budget cuts, the Board of Regents of the University of Wisconsin mandated that significant cuts in administrative costs be made at the dean's level and below," he said. "Our efforts to reduce the number of schools in order to cut administrative costs is consistent with actions being taken at several other UW institutions."

DePuy said that faculty, staff and students all had an opportunity to offer suggestions for the plan. "Every member of the university community has had the opportunity to contribute their ideas," he said. Those opportunities included public forums and a Provost's

Advisory Committee on Academic Restructuring, which included representatives from the university's various segments.

Sorensen said that three additional issues need to be addressed in the near future:

- **Duplication** "I am asking the provost to appoint an appropriate team to identify and study course duplication and eliminate all unnecessary duplication within and between our academic programs and departments," the chancellor said.
- **Deans** "The provost will address the issue of appointing deans to the new colleges," Sorensen said. "He will address the level of support for each college."
- Sorensen also said that other refinements to the academic structuring can be considered after the new colleges are in place and functioning.

"The objective is to preserve the quality of instruction by cutting administrative costs."

Improving the process of education

Nakatani Center applies research and technology to teaching

UW-Stout's Nakatani Center can make its own CD-ROMs that store as much information as 500 computer discs. Even computer novices can begin to understand the impressiveness of that potential.

The wealth of knowledge that that represents is, however, unfathomable, even to the educators who use the Nakatani Center to learn how better to dispense that knowledge.

Constantly improving the process of education is the vision of the Nakatani Center. Through the integration of cross-disciplinary processes that employ technology, research and partnerships with business, industry and education, the art and science of teaching can be greatly refined.

In times of increasing budget cuts and belt tightening, opening high-tech centers like this one is difficult, if not impossible. But UW-Stout's Nakatani Center was made possible through an endowment from the family estate of a Stout alumnus, Arthur Nakatani. According to

Joe Hagaman, director of the center, operating expenses are kept at a minimum. "We are living off the interest of the endowment," Hagaman said. "We still have the one and a half million."

Arthur Nakatani, an elementary school teacher in the District of Kona, Hawaii, passed away in 1989 while still in his 30s. At the death of his mother, Kiyo Nakatani, a bequest from her estate in memory of Arthur was endowed to UW-Stout. UW-Stout was then able to open the center to provide an extensive program of workshops, campus conferences, professional support for educators as well as technological linkages among a multitude of constituencies.

"The Nakatani Center's environment will provide stimulating, nurturing and pluralistic learning experiences for educators and their students," Hagaman said. "It will capitalize on the strengths of Stout to help provide cutting edge innovations in the design and application of research and technology to teaching."

Primary emphasis at the center currently is to provide support to faculty and staff through the grants they write, according to Hagaman. He noted that \$40,000 in grants were awarded this past year.

Other activities include establishing a World Wide Web workstation at the Library Learning Center; providing multimedia training and development programs; videoconferences on the uses of instructional technologies; continued development of the Nakatani Web site; promoting partnerships with business, industry and education; and a summer academy for K-12 educators. The bottom line is to help educators to better use technology in their teaching.

It is said that Arthur Nakatani, from a wealthy family, chose to teach because he loved it. It seems appropriate that the bequest that launched the UW-Stout facility will benefit others dedicated to teaching, like Arthur Nakatani.

"The Nakatani Center... will capitalize on the strengths of Stout to help provide cutting edge innovations in the design and application of research and technology to teaching."

Joe Hagaman

Making News

UW-Stout's Womack serves as interim chancellor at UW-Superior

Appointment of Jan Womack as interim chancellor at UW-Superior is a tribute to her leadership, creativity and administrative abilities, UW-Stout Chancellor Charles W. Sorensen said. Womack, UW-Stout's vice chancellor for administrative and student life services, was named to the post by UW System President Katharine Lyall.

The appointment will be through July 1996, when a new chancellor for UW-Superior is expected to take office. "I am looking forward to her return to UW-Stout, and we certainly will miss her leadership on this campus," Sorensen said. "At the same time, this is a great opportunity for her. It underscores a statewide reputation she has in information technology and innovative administration."

Womack said that she is looking forward to working with faculty and staff at UW-Superior. "This certainly will be an exciting challenge," she said. "I am looking forward to learning more about UW-Superior and its contribution to the UW System. I know this is an excellent institution, and I am quite proud that I have been chosen to provide its interim leadership."

Womack joined the UW-Stout staff in summer of 1989 after serving as vice president of administrative services at Oklahoma State University's College of Osteopathic Medicine. She has a doctor of philosophy degree in higher education administration from the University of Oklahoma and a juris doctor degree in law from Oklahoma City University.

During her appointment, Diane Moen, director of business and financial services, is serving as vice chancellor. Sorensen said Moen has an excellent grasp of budget and issues facing higher education.

Womack

Kufahl elected to Packaging Hall of Fame

Marvin Kufahl, founder of UW-Stout's packaging program, has been elected to the Packaging Hall of Fame by the Packaging Education Forum. Kufahl was honored at a banquet held at the Ritz Carleton Hotel in Chicago.

"The nominations were particularly strong this year," noted Jim Iciek, staff manager charged with organizing the election. "We had many worthy individuals who have accomplished and contributed in many facets of packaging over their careers, and I am sure that the members who voted in this election had a very difficult time making the final selection."

Kufahl joined the UW-Stout faculty in January 1956. He was given the assignment of developing and coordinating the packaging program in 1965. Before his retirement in 1991, he directed UW-Stout's Packaging Research and Development Center, coordinated the packaging concentration and taught packaging courses.

After his retirement, Kufahl was retained by the university to develop the rationale behind the establishment of a four-year packaging degree program which was approved last year.

He holds memberships in the Institute of Packaging Professionals and the National Association of Industrial Technology Education. He has served on the D-10 committee of ASTM, as well as numerous committees on the UW-Stout campus.

Kufahl

Rehab technology receives grant to study assisted living

Providing safe and appropriate residential services for persons not able to live in their own homes is becoming an important growth industry, according to Al Noll, director of the Center for Rehabilitation Technology (CRT) at UW-Stout, which has been named the recipient of a unique grant on assisted living from the UW System.

The Applied Research Grant recognizes the cost effectiveness of human service programs offering independent living options to the elderly and provides funds for further research into their needs.

The project will work cooperatively with Wovenhearts Residential Assisted Living of the Heartland Retirement Services. Findings will be provided to enhance the operation of this program and other assisted living programs throughout the state.

"Much has been said regarding the aging of American society," Noll said. "This aging is the result of demographic factors and medical advancements. Social factors have complicated the provision of care for persons as they age and lose functional abilities."

Noll said that fees for assisted living are approximately two-thirds the cost of nursing home care. He said that assisted living facilities are transition points for those who cannot live alone but who are not in need of skilled nursing care.

"The efficient and effective design and operation of residential facilities is critical to the provision of humane, appropriate life-enhancing and economically viable living services," he said. "Using Heartland Retirement Services as a case study, this project will help the assisted living care industry assure the effectiveness and viability of their operational procedures, future facilities, equipment and services."

The project is a joint effort between CRT and the industrial management department at UW-Stout.

Gehring, Molczan recognized for outstanding research efforts

Glenn Gehring has been named UW-Stout's Outstanding Researcher, and Julene Molczan received the Nelva G. Runnalls Research Support Recognition Award.

Gehring was chosen by a vote of the graduate faculty and principal investigators of extramurally funded projects during the past fiscal year. The Outstanding Researcher Award recognizes individuals for leadership and contributions to research and scholarly activities.

Molczan, grant and contract accountant in UW-Stout's Business and Financial Services Office, received the Nelva G. Runnalls Research Support Recognition Award in recognition of her support, recognition and resources in helping colleagues pursue their research and scholarly activities. Gehring is a professor in UW-Stout's technology department and a member of the Stout Technology Transfer Institute, where he serves as director of the Center for Innovation and Development. He is also the assessment coordinator for the Northwest Wisconsin Manufacturing Outreach Center (NWMOC).

In 1987, Gehring became project manager for the 20-month UW-Stout/SNE Enterprises project in Wausau. He assisted with modernizing window and door manufacturing operations, and in researching and planning a new 635,000-square-foot manufacturing facility.

After SNE, Gehring continued teaching and began working with the newly developed Manufacturing Technology Transfer program. In 1990, he left the formal classroom when he assumed directorship of the CID. In

Gehring

Molczan

that position, he participated in a 12-month project with John Deere and Phillips Plastics to develop a returnable containers system for use at John Deere's Horicon plant.

Gehring's varied research activities provide a hands-on, minds-on approach to improving the learning and comprehension of UW-Stout students, and have contributed to the evolution of the university's industry and technology programs. He served on the committee that developed the applied technology program and later was one of its co-directors. At the present time, he continues curriculum work as a member of the manufacturing engineering degree program committee.

Molczan started her career in the business office as a Limited Term Employee doing student and miscellaneous accounts receivable activities, then progressed to responsibilities in the accounts payable and general ledger department. Her permanent position began in general ledger in 1975.

As grant and contract activities increased on campus, her position became more specific to the issues surrounding the fiscal management of these extramural funds. Her responsibilities now include monitoring and maintaining fiscal policies and procedures; and providing oversight for operations and controls of all extramural support programs necessary for satisfying the requirements of the granting agency, the university, and the state. She provides fiscal administration of inter-institutional agreements and UW Extension agreements; maintains cash management systems; performs accounting activities for federal financial aid programs; and assists the budget office with account monitoring and FTE activities.

Molczan has assisted numerous principal investigators and project directors and their staffs through the fiscal and post-award aspects of grant and contract management. She has worked closely with federal and agency auditors to keep principal investigators informed of current issues.

Outreach Center recognized for aiding manufacturer

For the third time, UW-Stout has received national recognition for its technology transfer program.

The Northwest Wisconsin Manufacturing Outreach Center (NWMOC), administered by UW-Stout, has won second place in the business assistance category of a competition conducted by the National Association of Management and Technical Assistance Centers (NAMTAC).

UW-Stout received NAMTAC awards on two other occasions: a first place award for technical assistance in 1987 and a first place award for technology transfer in 1991.

NWMOC won the award for its efforts to help a local manufacturer, Tiffany Fine Woods, improve operations and shore up declining profits. The center, administered by the Stout Technology Transfer Institute, is a partnership between the university; and the Chippewa Valley, Western Wisconsin, Wisconsin Indianhead, Nicolet Area, and Northcentral Technical Colleges.

Tiffany Fine Woods is one of the top 10 manufacturers in Trempealeau County, where it has operated its hardwood roughmill and dimension operation for more than 20 years. In recent years, operating costs increased while competitive pressures intensified, causing a steady decline in profits.

The first phase of NWMOC assistance involved Tiffany's participation in a four-part value added manufacturing seminar series on manufacturing modernization. As a result of the seminars, the firm realized a need to

update and upgrade its manufacturing system and, consequently, applied for in-depth assistance from NWMOC to implement a modernization plan.

NWMOC conducted a formal assessment which identified focus areas for assistance. The center then worked with Tiffany to restructure its manufacturing methods, including a new Management Information System.

They also incorporated cutting-edge management strategies and technology including improvements to quality, material handling and systems control. The results were a dramatic increase in the dollar value and volume of lumber the firm could produce. This increased productivity led to a retention of 22 jobs and plans to increase the work force by 10 percent. In addition to these tangible assets, NWMOC's assistance gave the firm the assurance in management's ability to re-establish Tiffany Fine Woods as an industry leader.

The National Association of Management and Technical Assistance Centers is an organization composed largely of centers that are affiliated with institutions of higher education. Its members work to help transfer academic-based information and knowledge to communities and businesses in order to further economic development and enhance industrial productivity. Members provide assistance with business management, technology transfer and community economic development programs. NAMTAC sponsors an annual competition to recognize outstanding projects conducted by its member organizations in these fields.

Sabbaticals granted to staff members

Ten faculty members will receive sabbaticals during the 1996-97 school year through recent action by the UW System Board of Regents.

First semester sabbaticals have been awarded to Patricia McManamy, English; Wayne Nero, business; Michael Ridland, psychology; and John Vranak, technology.

Second semester sabbaticals have been awarded to Michael Levy, English; John Perri, art and design; Mitchell Sherman, psychology; and Leonard Sterry, communications, education and training.

Full-year sabbaticals for 1996-97 were granted to Dennis Mikkelsen, mathematics, statistics and computer science; and Susan Thurin, English.

Sabbaticals are granted by the board to recognize teaching efforts and excellence. Purpose of the program is to enhance teaching, course and curriculum development, research or other scholarly activities related to instructional programs.

UW-Stout awarded national media fellowship

UW-Stout is one of only 50 institutions from throughout the United States to receive a National Media Fellowship from the Council for the Advancement and Support of Education.

Under the fellowship program, journalists from major national news publications with circulations of more than 200,000 and major-market broadcast media spend time on campuses to learn more about higher education and to better understand the intellectual resources of higher education.

UW-Stout's fellowship, which is opened to an unlimited number of journalists, is titled "Helping Small Companies Re-tool for the Future." Its focus will be on how comprehensive universities contribute to their state and region. Participants will examine the university's technology transfer program, which assists small and medium-size manufacturers in gearing for competition in the global marketplace.

NIST announces environment support grant

The Northwest Wisconsin Manufacturing Outreach Center (NWMOC), housed at UW-Stout, has received cost-sharing funding from the National Institute of Standards and Technology to help smaller manufacturers reduce or eliminate pollution sources in their operations. An environmental specialist will be added to NWMOC's staff. Activities will include environmental needs assessments and field agent training.

"More efficient use of materials and better management practices will help smaller manufacturers be both environmentally sound and competitive," said Commerce Secretary Ronald H. Brown. "This is one more example of how the Commerce Department's Manufacturing Extension Partnership is playing a vital role in helping America's small and medium-sized companies adopt modern technologies, enabling them to grow and prosper and create jobs."

Journalists involved in the fellowship will work with Chancellor Charles W. Sorensen, team up with faculty and students involved in technology transfer and visit manufacturing sites where the program has been successfully applied.

Under the one-week fellowship, CASE covers room and board costs for the participants, and media organizations cover travel expense and the journalists' salary.

UW-Stout's entry was selected by a panel of judges representing U.S. News & World Report, Newsday, the Philadelphia Inquirer and the Washington Post.

Sorensen said that this is a major recognition for the university's technology transfer program and the institution's contribution to the state's economy.

Foundation Report

Hedberg Computer Laboratories Dedicated

Labs are the most sophisticated on campus

GERALDINE R. HEDBERG visited campus this past October to personally assist in the formal dedication and ribbon-cutting ceremony of the Hedberg computer laboratories in Fryklund Hall.

Chancellor Charles W. Sorensen and Bruce Siebold, dean of the School of Industry and Technology, thanked Hedberg for the major investment. Speaking to a large crowd of faculty, staff, friends and campaign chairs, Sorensen indicated the consequences of the gift have been absolutely astounding for both the faculty and students.

The Hedberg laboratories are the most sophisticated on campus. The interactive computer equipment is used by students enrolled in 23 sections of industrial design, industrial technology, manufacturing engineering and interior design classes. More than 500 students will use the laboratories during the school year.

In addition to the heavy use during the day, the laboratories are used on an open-lab basis during the evenings and weekends for an

additional 30 hours. The labs are maintained by qualified undergraduate students and students employed through the work study program.

The following faculty are currently teaching courses in the Hedberg laboratories: Jerry Johnson, Lou Moegenburg and Jerry Roiter. William Rueth Jr., technology department; and Bob Chiodo, technical adviser, are also key to implementing computer usage into the curriculum and the laboratories.

Hedberg's dedicatory remarks described a world of change in which industry and businesses are competing to stay alive. She stated, "UW-Stout has maintained its integrity as it continues to educate students and faculty in a sophisticated technological setting. This university is vibrant and able to fulfill its obligations through an applied education program. Students are confident and techno-logically challenged. They will savor new work environments and enjoy the responsibilities available to them because of this education."

Geraldine Hedberg and Larry Schneider, Assistant to the Dean, School of Industry and Technology.

Chancellor Charles W. Sorensen presents Geraldine Hedberg with a gift of appreciation.

Annual fund and research director named

UW-Stout Foundation Director Patricia W. Reisinger announces the appointment of Jennifer Homer to the position of Annual Fund and Research Director for the Foundation. Homer is a 1995 UW-Stout graduate in human development and family studies. She comes to the position with four years of experience with the Foundation and Alumni Services. She has worked with the Annual Fund as phonathon manager and assisted with many alumni activities.

Her time as an undergraduate included many extracurricular activities. She served as secretary and president to the Stout Council on Family Relations, was an active member of Phi Upsilon Omicron Honor Society, and has been highly involved as a volunteer for several community agencies including Kinship and West Central Domestic Abuse. She was also elected to Who's Who Among Students in American Universities and Colleges for two consecutive years.

Homer concluded her undergraduate study

with an internship in the Human Resources/Employee Services Department at 3M in St. Paul. She worked with the company's "Work/Life Program" which assisted employees in balancing work and family responsibilities. She arranged on-site educational programs, served as company liaison with various community agencies, and maintained resource and referral materials related to work and family issues.

"Her outstanding curricular and extracurricular experiences will be a great asset to the Foundation in both the annual fund and research areas," stated Reisinger.

Homer

Foundation board elects officers

The annual meeting of the Stout University Foundation was held Sept. 22-23. Robert Sorensen BS '60, MS '65, associate director, Ceneter on Education and Work, UW-Madison, was elected president of the board of directors. President elect is Kim Entorf '84, principal, Bayport Properties. Secretary is Linda Funk '76, director of National Product Communications, Wisconsin Milk Marketing Board. Karen Martinson '82, assistant professor in the UW-Stout business department, continues as treasurer.

Joining the board are Robert Jeatran, owner of Jeatran Insurance, Menomonie; Lou Tiffany '76, certified financial planner, American Express Financial Services, Minneapolis; and Dan Ostermann '91, vice president, M&I Community State Bank, Menomonie.

Plaques of appreciation were presented to retiring board members David Barnard BS '46, MS '47, professor emeritus, UW-Stout; Rita Christoffersen BS '60, MS '63, professor, apparel, textiles and design, UW-Stout; David Fesler, St. Paul, Minn.; Mark Peddecord, owner, Cheesy Pizza and Pasta Restaurant, Menomonie; and Steven Vande Berg MS '75, owner, Best Western Holiday Manor, Menomonie.

Honeywell exec serves as Cabot Resident

Bruce Siebold, School of Industry and Technology; Mary Carter '77 and Scott Cabot '78.

Mary Carter '77, vice president of Human Resources for Home and Building Control, Honeywell Inc., delivered a keynote address Nov. 7 as part of the university's Arthur R. Cabot Executive Residency program.

Carter received her bachelor's degree in business administration with a concentration in marketing and textiles from UW-Stout. Her career began with Honeywell as a HVAC service sales representative in Chicago for what is currently the Home and Building Control business. She has held various positions with Honeywell, assuming her present position in July 1993 as the youngest vice president ever appointed to the executive level of Honeywell.

Her community leadership has included a five-year appointment by the U.S. Secretary of Education as chair to Gallaudet University's National Advisory Committee of the Model Secondary School for the Deaf.

While on campus, Carter attended a computer aided manufacturing class presentation. She spoke

to the international business, employee involvement and organizational leadership classes. She also met with the Women in Engineering and Science student organization.

The Cabot Executive Residency program is named in memory of Arthur R. Cabot, who was a successful pet products manufacturer. Cabot's son, Scott, is a 1978 UW-Stout graduate and president of Vanguard Consulting Group, Deerfield, Ill. He was present for Carter's keynote address.

As Cabot Executives, major corporate leaders spend one or several days on campus during which they are involved in faculty development, interaction with classes, seminars and open presentations. Cabot reflected, "This is a program which offers both faculty and students a chance to meet with individuals who have successful careers in industry. Mary Carter exemplifies the ideal candidate. She has experiences in all aspects of the industry."

David W. Wendt

David W. Wendt, 64, died unexpectedly Sunday, Jan. 7. He graduated from Stout with bachelor's and master's degrees in industrial education. He was named in "Who's Who of American College Students" in 1954-55 and lettered in football. After receiving his master's degree in 1959, he held several engineering positions before founding Design Concepts Inc., in 1970.

Wendt recently completed his tenure as president of the Stout University Foundation Board of Directors. The Foundation was honored during his tenure with two CASE fund raising awards. The family suggests memorials be made to the Stout University Foundation, P.O. Box 790, Menomonie, WI 54751.

Foundation Annual Report: A "class" project

THIS year's Foundation Annual Report, mailed in November, was completely redesigned thanks to students enrolled in UW-Stout's graphic arts production technique class.

The class is an elective in the graphic arts management program. It offers students work experiences similar to those they will encounter in the graphic arts industry.

Students worked closely with Foundation staff and were responsible for most facets of the production: pre-press, printing, proofing and binding the report. Bill Best was the production coordinator. Professor James Tenorio and lab manager Jerry Addie guided the students through the seven-week project. They printed 36,000 copies of the report.

"Courses in our Graphic Communications Management program, like the one that produced the Stout Foundation's Annual Report, benefit all parties involved," said Tenorio. "The Foundation, and other university departments, can have a very cost-effective way to obtain quality custom-printed materials. Our students get valuable hands-on experience producing real products for their clients and learn firsthand the concepts of planning, quality, service, cost control, problem solving, meeting deadlines and satisfying the customer."

"If something is not done correctly, it cannot be dismissed as only being a demonstration or a practice exercise. The student and the instructor can't just say, 'If this were done out in the real world, we would fix it by doing such and such.' The students must follow through and take the time to correct the problem. Sometimes it means staying late into the night (*one press run this semester went until 5 a.m. on a Saturday*) to meet a deadline. When the job is finished and done right, the students will really remember the lesson."

Graphic arts management program students in the Graphic Arts Production Techniques course and some of the 36,000 Foundation annual reports they printed and bound as one of their class assignments. Front row (l-r): Albar Abdul Rahman, Russ Gamett, Bill Best. Back row (l-r): Phil Kell, Doug Jenquin, Sheri Witt and Craig Larson.

Giving to UW-Stout through gifts of appreciated securities

Commitments from alumni, friends, businesses, foundations and others help to support UW-Stout. Such generosity enables the institution to continue to provide resources and initiatives not funded by state support.

These gifts add an extra dimension and are critical to all academic programs at the university. Donors make a difference in the lives of everyone on campus. The following information on Gifts of Appreciated Securities may help you accomplish your goal of donating funds to UW-Stout.

Gifts of appreciated securities

It is often more tax-wise to contribute securities than cash. If you have appreciated securities, giving them instead of cash to your favorite charity offers a two-fold tax savings. In addition to a charitable deduction for the full fair market value of the securities on the date of the gift, you may avoid any capital gain tax on the appreciated securities.

For example: Mr. and Mrs. Doe, who are in the 31 percent income tax bracket, own securities currently valued at \$12,000 which were purchased for \$2,000. They contribute the securities to the Stout University Foundation and realize a \$12,000 charitable deduction, which saves them \$3,720 in income taxes (*31 percent of \$12,000*). In addition, the Doe's avoid capital gain tax on their paper profit for a further tax savings of \$2,800. Therefore, the net cost of their \$12,000 gift of appreciated securities is only \$5,480. The net cost of the gift may be further reduced because of state tax advantages also.

Gifts of appreciated stock are fully deductible up to a maximum of 30 percent of your adjusted gross income. Any amount in excess of the 30 percent ceiling can be carried forward for five years. The securities must have been held for a "long-term" period (*this generally means for more than one year*) to qualify for these significant tax savings.

The Stout University Foundation will be happy to answer any of your planned giving questions. Please contact:

David Wiensch, Planned Giving Officer
Stout University Foundation Inc.
715/232-1151.

Planned Giving

**David
Wiensch**

Micheels endow student artist in residence program

In 1988 William J. "Bud" and Betty Micheels funded a unique student artist in residence program. Each spring, the art department invited students to apply for the award which provides students with a stipend for art materials and studio space, as well as guidance from a faculty mentor as they meld their ideas about art and technology into tangible artworks. "It should stimulate student involvement in addressing the relationship of art and technology," Micheels explained.

This past October, the Micheels guaranteed the program would be ongoing by endowing the program with a gift of \$66,500. Bud remarked, "Art was always important to Stout's curriculum but it wasn't until 1964 that a separate art department was established." The Micheels award provides for a greater awareness of the UW-Stout art program and, at the same time, provides the campus with a permanent collection housed in the Library Learning Center.

Following a year as an "Artist in Residence," the students show their artwork in the Library Learning Center. At that time, a selection committee chooses one piece of art from each student which is donated to the university for permanent display in the library. Chancellor Charles W. Sorensen stated, "Art and technology should be closely aligned. The gift from Bud and Betty Micheels is a tribute to their love of the university and their love of art and design. It's

Betty and Bud Micheels

fitting that Micheels, who established the art program at UW-Stout, continues to provide funds and a great honor to students who are selected for the Artist in Residence program each year."

William J. Micheels served as president of Stout State University from 1961 through 1971 and one year as chancellor. Currently, Bud serves on the Stout University Foundation Board of Directors.

Cabot donates artwork

When Scott Cabot was a student at UW-Stout, he had no interest in the visual arts. And, he probably couldn't have imagined that one day he would develop not only an interest in art but, together with his wife Janet, he would become an enthusiastic collector of original fine art prints. But he has. And, for those who know Scott and his history of involvement and support of UW-Stout, it will come as no surprise that he and Janet would want to take that interest and apply it to a need at UW-Stout.

Last year, the Cabots initiated the UW-Stout Scott and Janet Cabot Print Collection with a contribution of a James Swan print, the first of an ongoing, annual contribution to the Furlong Gallery permanent collection. That first print, an etching by Swan titled "Willow," has been followed this year by an etching by Joseph Pennell. Pennell, like Swan, was a noteworthy American artist with a significant reputation in American art history. Work by both artists is included in major national collections such as the Smithsonian, the National Gallery and numerous university gallery collections.

Scott Cabot

The Pennell print is an etching executed in 1904 as part of a New York series. Pennell is also known for a series of prints he did of the construction of the Panama Canal, and for an ongoing interest in industrial subjects such as docks, cranes and buildings. James McNeil Whistler was a mentor of Pennell's when Pennell lived and worked in Europe for 20 years. Pennell is credited with helping establish printmaking as an important fine art medium in America.

Cabot is enthusiastically looking for the next print to add to the Cabot Collection, and he wants it to be a special selection to help celebrate the planned move of the Furlong Gallery into its new facility.

Scholarships

1995 - 96 scholarships awarded

This past September, donors and scholars were united as they enjoyed the annual Stout University Foundation Scholarship Reception. This year, 336 students shared in a total of \$250,000. The office is frequently asked who is receiving the awards. The following information was compiled to answer some of those questions.

1995 - 96 Stout Foundation Scholarships

National Trust Fund of the Graphic Arts Awards Scholarships

Front row (l-r): Chad Robb, Jackie Breuning, David Clark. Back row (l-r): Gary Jacoby, James Kelly, Robert Dorsey, Douglas Hansen, James Herr, professor.

These students are recipients of the National Scholarship Trust Fund (NSTF) scholarships. All are pursuing a graphic communication industry education.

The National Scholarship Trust Fund was organized in 1956 as a non-profit, private, industry-directed corporation to develop and dispense scholarship and fellowship assistance to talented men and women interested in communications careers. All scholarship recipients are required to maintain a "B" average throughout their college studies.

The National Scholarship Trust Fund of the Graphic Arts, Inc. is under the guidance and control of an elected board of directors. NSTF is affiliated with the Graphic Arts Technical Foundation (GATF).

International Business

Foreign Language Study Abroad Scholarship

Dennis Vanden Bloomen, an associate professor in the department of business, has spearheaded an effort to fund scholarships for students who wish to improve their foreign language experiences. This fall, the first scholarship, in the amount of \$500, will be awarded to a student studying abroad who pursues and includes a foreign language component.

Preference will be given to general business majors planning to study in Mexico. Vanden Bloomen recognizes the importance of travel and learning a second or third language. "Students competing in the job market with a second language will have many more opportunities for employment both within and outside of this country," he said. "A second language provides a student with an ability to think in another language and to better understand another culture."

Alumni and friends interested in contributing to this special scholarship may contact the Stout Foundation or Dennis Vanden Bloomen.

Fulton and Edna Holtby Manufacturing Engineering Scholarships

Row 1 (l-r): Fulton Holtby, Alexander Zeitler, Jason Vande Loo. Row 2 (l-r): Ehrich Shaw, Bruno Rahn, Dennis Rosenbrook, Luke Prasch, Philip Paquette, Eric Meyer. Row 3 (l-r): Eric Matthews, Chad Mason, Jason Lee, Scott Larson, Daniel Lamphere, Jason Kern. Row 4 (l-r): Bradley Heckendorf, Rodney Gramse, Adam Dejno, Jerry Brainerd, Stanley Anderson, Richard Beyer, Carl Alleman.

Twenty-four manufacturing engineering honor students were awarded Fulton and Edna Holtby scholarships this fall. Fulton is a retired University of Minnesota mechanical engineering professor. He is an expert witness in the field of engineering, materials, process and design. "I am honored to support a manufacturing engineering program which incorporates an applied component to its curriculum. Mixing theory and application to each area of study will be of great benefit to the students." The scholarships were awarded in the amount of \$500 each.

Nitz Bequest Provides Scholarship Endowment

Otto Nitz passed away this year. He was a revered UW-Stout faculty member remembered for his love of chemistry and for mentoring many of the students who had the privilege of having him as their teacher.

Dawn Carlson '70, presently a senior clinical dietitian at the Johns Hopkins Hospital in Baltimore, remembers Nitz: "When I was a student at UW-Stout, Otto Nitz was my favorite professor. I was very impressed with the personal interest he took in my education and in the amount of time he devoted to students outside of the classroom. His office door was always open. Providing scholarship money through his will is consistent with the way he always gave of himself to assist students in learning."

After his retirement in 1971, Nitz enjoyed photography and other special hobbies. Through a bequest, Nitz endowed a scholarship fund to be known as the "Olive and Otto Nitz Endowed Scholarship Fund" in the amount of \$28,000. The first scholarship will be awarded in 1997.

Otto Nitz

Olive Nitz

Engers Create Endowed Scholarship Related to First Amendment

John K. and Christine M. Enger have established a scholarship which addresses the First Amendment. An endowment of \$10,000 will fund the initiative.

John is director of University Relations at UW-Stout. He has been with the university for more than 26 years, serving in several administrative appointments. Before joining the UW-Stout staff, he was employed as assistant news director/anchor at WEAU-TV and news director at WBIZ radio, both in Eau Claire. He has a bachelor of arts degree from UW-Eau Claire. "Chris and I are extremely pleased with this opportunity to further the education of Stout students while encouraging them to reflect on the various aspects of the first amendment, clearly one of the greatest instruments of freedom ever crafted."

Christine '73 has been a member of the UW-Stout staff since 1981. She taught industrial management courses prior to becoming a financial aid counselor in 1983. She has a bachelor of science degree in vocational rehabilitation and worked with special needs adults before joining the university staff. "My husband and I have been a part of the university community for many years, and I am glad that we are able to show this support for such a fine institution," she said. "We are both ardent supporters of the Bill of Rights and especially the First Amendment."

The first scholarship will be awarded in 1996. Applicants must submit an essay on one of the five clauses of the First Amendment to the U.S. Constitution.

Christine Enger

Alumni Association News

Three join alumni board

At the October meeting, the UW-Stout Alumni Association elected Thomas Fonfara '84, Roman Gill '57 and Julie Beaver Kinney '76 to join its board of directors.

Thomas Fonfara received a degree in business administration. Fonfara is currently serving as executive assistant in the Wisconsin Department of Revenue. As executive assistant, he works closely with secretary Mark Bugher in the overall management of the 1,200 person agency and leads the legislative and government relations function of the agency. Prior to this, Fonfara served as legislative liaison for the Commission of Banking for a little more than a year. For nearly seven years, Fonfara worked in the Office of Governor Tommy G. Thompson. As one of the Governor's original staff members, he worked in various positions and ultimately became policy director, where he managed a staff of six policy advisers and for years was Thompson's key adviser on education issues. Fonfara and his wife, Robin, have one son, Phillip, and make their home in Sun Prairie, Wis.

Fonfara

Gill

Roman Gill received a bachelor's degree in technical education and master's degree in industrial technology. In 1990, Gill retired from 33 years of teaching including 17 years as an athletic coach in Wisconsin and Michigan high schools. Currently, Gill is a member of the City of Escanaba HUD Housing Commission. He is a life member of the American Legion and MEA/NEA Retired School Personnel. Gill and his wife, Gayle, have two grown children and two grandchildren. They reside in Escanaba, Mich., where Gill enjoys hobbies of fishing, hunting and bowling.

Kinney

Julie Beaver Kinney is the vice president for All American Manufacturing of Boyceville, Wis. It's a company Kinney and her husband, Mark, started in 1982 in the basement of their home. The firm now employs 140 persons, including several UW-Stout graduates in key posts. Kinney serves as the Menomonie Sunrise Rotary treasurer. She holds a degree in vocational rehabilitation. The Kinneys and their two daughters, Katie and Angela, reside in Menomonie, Wis.

One board member was re-elected and named secretary:

Marilyn Krause Leccese '74, family and consumer education, director of educational resources, Broadlawns Medical Center, Des Moines, Iowa.

Special thanks to these members who have retired from the board:

Colleen Hartmon '88, applied math, MIS consultant, Larson Allen Weishair & Co., Minneapolis, Minn.

Ted Hein '52, industrial education, retired from IBM.

John Zupke '81 '90, hospitality and tourism management, marriage and family therapy, Institute for Human Resources, Minneapolis, Minn.

Applications available for alumni scholarships

Last year, the UW-Stout Alumni Association awarded \$3,000 through the Stout Alumni Association Graduate Scholarships and Robert S. Swanson Fellowship. Ranging from \$750 to \$1,500, these awards are not exclusively based on the applicant's financial need.

Graduate scholarships must be used for a graduate program at UW-Stout. All applicants must have completed a degree from UW-Stout or be currently enrolled at UW-Stout in an undergraduate or graduate program.

Fellowship applicants must have attained a degree from UW-Stout prior to applying for the award. A total plan explaining the use of the stipend should be included. The fellowship may be awarded for several types of study: research projects, doctoral studies, seminars that enhance a program you are now involved in or a program that may aid in a career change. An individual can be awarded the fellowship no more than two times. No single factor will be responsible for an applicant receiving a scholarship. Factors which

are considered include academic performance, recommendations, professional activities, extracurricular activities, community involvement and written application statements.

The Scholarship Committee will review applications and make selections in the spring, and inform the recipients in May, subject to the approval of the UW-Stout Alumni Association Board of Directors.

UW-Stout Alumni Association scholarships and the fellowship are financed by funds collected from past membership dues (*eliminated in 1982*). In addition, royalties from the Alumni Association University and University Gold cards through WESTconsin Credit Union contribute to the endowment.

Applications and letters of reference must be postmarked on or before March 1, 1996 and sent to the UW-Stout Alumni Office, PO Box 790, Menomonie, WI 54751-0790. For an application or more information, call 715/232-1151.

Where we're at

Greetings! In response to your interest about fellow UW-Stout graduates living in your area, we have included a map of the United States noting the number of graduates by state. Although the map indicates that 80 percent of the graduates reside in Wisconsin and within bordering states, geographic distance need not inhibit your involvement with and support of the University.

As an individual you can serve as an advocate of UW-Stout to prospective students, assist the University with the identification of co-op locations for current students, participate in the UW-Stout Alumni Association credit card program (*which helps fund the graduate scholarships and fellowship — see page 10*), nominate fellow alumni for awards and to the Alumni Association Board, and serve as a host/hostess at regional gatherings.

If you reside in Wisconsin, your legislative contacts in support of the UW System, particularly to deter decisions around budget cuts, are greatly appreciated. Also, volunteers are needed to serve on committees to review scholarship and fellowship applications, and alumni award nominations; these committees normally operate via teleconference and do not require travel to Menomonie.

You are welcome to maintain contact with the University and Alumni Association through the Internet. Finally, I encourage you to keep the UW-Stout Alumni Association informed about what is happening in your life, so that this information can be shared with fellow alumni in the Class Notes section of the Stout Outlook.

Committee seeks alumni board nominations

The Nominating Committee of the UW-Stout Alumni Association is seeking nominations for the Stout Alumni Association Board of Directors. Alumni are encouraged to submit recommendations by completing the form below and returning it, along with the nominee's current resume, if possible, to the UW-Stout Alumni Association, Nominations Committee, Louis Smith Tainter House, PO Box 790, Menomonie, WI 54751-0790 by Aug. 1.

Nominees should be:

- Willing to serve a two-year term on the Board of Directors.
- Able to attend two meetings held in Menomonie, annually.
- Willing to serve actively on committees as needed.

Credit cards support alumni programs

Director's
Message

Suzette F.
Hittner

In August, the UW-Stout Alumni Association launched an exciting new credit card program available to UW-Stout alumni, students, faculty and staff. Thank you to everyone who has taken the opportunity to participate in this program.

Every time a UW-Stout card is used, a portion of the purchase goes to support the UW-Stout Alumni Association Graduate Scholarships and Robert S. Swanson Fellowship. In October, the first royalty check was presented to the Alumni Association Board of Directors and added to the endowed account that

supports these programs.

Some of you may say that you already have the UW-Stout Alumni credit card offered through MBNA. The Alumni Association is no longer affiliated with that organization and is not receiving any benefits from your use of their card.

I think you'll find this new card, which is offered through WESTconsin Credit Union (WCU), a great bargain. It's less expensive than most credit cards. WCU's interest rates and fees are reasonable, and they have a great reputation for fine service.

WCU offers you the option of consolidating your current cards into the UW-Stout Alumni Credit Card. You also have an Air Travel Mile Program with the option of airline tickets or \$300 cash back with the UW-Stout Alumni Association Gold MasterCard. For more details, contact WESTconsin Credit Union at 715/235-3405.

Again, on behalf of the UW-Stout Alumni Association, thank you for your support in this very important new UW-Stout Alumni Association endeavor.

Nominations sought for 1996 Distinguished Alumni and Service Awards

The UW-Stout Alumni Association wishes to recognize the accomplishments of its alumni, and to acknowledge their personal, professional, and community contributions. Nominations for the Outstanding Alumni, Distinguished Alumni and Service Awards are being solicited from alumni, the faculty, staff, and administration. The Outstanding Alumni Award is presented to UW-Stout graduates no more than 15 years out from the receipt of their bachelor's degree. The Distinguished Alumni Award is presented to a UW-Stout graduate more than 15 years out from receipt of their bachelor's degree. The Service Award is presented to alumni and friends of UW-Stout in recognition of outstanding support in the development of the university and alumni affairs. You may nominate more than one person since we are sure there are many outstanding alumni who meet the criteria listed below. Your written nominations will be reviewed by a selection committee. Simply fill out the form at the bottom of this page and mail it to the Alumni Office by March 1, 1996. Thank you for your help in identifying UW-Stout's finest!

Nominees for the Outstanding and Distinguished Alumni Awards should exemplify:

Professional Distinction and Achievement—significant and broad professional accomplishments reflecting credit upon the individual and UW-Stout.

Community Service—specific and meritorious service to the community, state or nation.

Nominees for the Service Award should exemplify:

Advancement of UW-Stout's Mission—daily life exemplifying the mission and ideal of the university for promoting intellectual competence, personal development and service.

Additional Criteria for Nomination:

1. Nominations may be submitted by alumni, faculty, staff and administrators of UW-Stout.
2. Nominees must be living graduates of UW-Stout. UW-Stout faculty, staff and administrators are *not* eligible.
3. Selected recipients are required to be present at Homecoming '96 in order to receive their awards. Lodging expenses for the award recipient are provided by the UW-Stout Alumni Association. Recipients must provide own travel expenses.

Selection Process:

1. Nominations must be submitted to the Alumni Office.
2. An information form will be sent by return mail for each candidate nominated. This information form should be accompanied by a letter or statement in narrative form by the nominators explaining why they feel the qualifications of the candidate meet the award criteria. Other details or pertinent data that might prove helpful in supporting the nomination include documentation of public or professional recognition, articles or books published and honors received.
3. Final decisions regarding recipients of the award will be made by the Alumni Association Awards Committee, subject to the approval of the UW-Stout Alumni Association Board of Directors.
4. Nominees not selected in a given year may be considered for awards in a subsequent year.

Alumni Web page coming soon!

Visitors to UW-Stout's home page on the World Wide Web will soon find links for the Stout Alumni Association and the Stout University Foundation.

Find "Welcome to University of Wisconsin-Stout" on the main directory and proceed to that menu. You'll find us there sometime in early March. As with most web pages, ours is under construction.

We encourage you to visit and "sign our guestbook." In addition, we'd appreciate input you may have regarding content of our pages. Our desire is that the Foundation and Alumni pages would be helpful resources to help alumni connect with us and with other alumni. Planned features include a jump list to home pages of alumni, and an e-mail directory of alumni.

You may e-mail suggestions in advance to:

alumni2@uwstout.edu

Alumni in the News

UW-Stout Alumni Association

Gatherings

Milwaukee Area Retired Stout Alumni Hold Luncheon

The Milwaukee Area retired Stout alumni held their second annual luncheon Sept. 20 at Alioto's Restaurant. It was a fun-filled afternoon with 78 in attendance, and many renewed old friendships. An array of pictures taken at Stout from the '40s and '50s were on display.

The master of ceremonies was Walt Dusold '48, and Helen Tews '50 conducted the program after lunch. Ann Reuther '61, a Stout University Foundation board member, explained the many changes that have taken place at Stout. Attendees introduced themselves and told when they graduated. Francis Stephens '51 showed the video from Stout that's used as a recruitment tool aimed at students. Many also enjoyed viewing the scenes of the campus.

Door prizes, contributed by the Stout Alumni Association, were distributed by Ardelle Stephens '50 and Marilyn Dusold. Rowena Jorgensen '52 received a deck of playing cards for "the most recent retiree"; Joe Serfle '47 received a windsock with the Tower Emblem for a "birthday closest to the day"; and "Happy Birthday" was sung by the entire group. Phyllis Jelich '50 received note cards for "most recent degree from Stout" (*master's degree*); Mike Huley '52, a Stout tote bag for "person who travelled the farthest" (*Florida*); Paul Axelson '50, note cards for "anniversary closest to the day"; Gus Janssen '49, note cards for a "50th anniversary"; Ken Pederson '39, note cards for "earliest Stout grad"; Carolyn Mowbray '51, windsock for "being the first arrival." Jerry Solie received a windsock for "wearing the Stout colors."

Connie Olson '52 received a windsock for "having a child most recently graduated from Stout"; Ken Pederson, a windsock for "working the most years with the same employer"; Carolyn Dennis, a windsock for "having a great-grandchild most recently"; and Bob Berg '52, a dinner bell for "volunteering the most hours of work per week." The dinner bell was donated by Ardell '50 and Francis Stephens. Centerpieces were also given as door prizes to the people sitting at a "lucky spot" at each table.

A new addition this year was the distribution of a "newsletter for retired Stout alumni" that attended the luncheon. Elaine Papez compiled the newsletter on her computer, and plans are being made to include a directory for next year. The committee that organized the luncheon and program was Marilyn and Walt Dusold, Elaine and Jim Papez '51, Muriel and Henry Roesler '51, Ardell and Francis Stephens; and Helen and Russ Tews '50.

The next luncheon will be held the third Wednesday in September (*Sept. 18, 1996*) at Alioto's on Hwy 100 and Burleigh. Any Milwaukee area retired alumni not on the mailing list and interested in attending the 1996 luncheon, please contact Helen Tews, 8815 Westlake Drive, Greendale, WI 53129 or call 414/425-3814.

Polzin named vice president at Ceres Communications

Kimberly K. Polzin '78, home economics in business, has been named vice president of Ceres Communications, a diversified marketing communications agency specializing in the agricultural, environmental and chemical industries created in early 1994 by Mona Meyer McGrath and Gavin (MMM). Both companies are units of London-based Shandwick, the world's second-largest public relations consultancy. Polzin was an account supervisor with MMMG.

Polzin, who specializes in environmental, food production and food processing accounts, including Ciba Crop Protection and the Klenzade division of Ecolab Inc., sees this promotion as an exciting opportunity to expand her work with worldwide clients.

"This is an opportunity to build Ceres by serving existing clients exceptionally well and seeking new clients in our specialty areas," said Polzin. "I've already had an opportunity to work in our London office on client projects affecting Europe."

Polzin has been in public relations for more than 15 years, including positions as communications director for National Farmers Union and Minnesota Farmers Union. She started her career as a reporter and editor for the Chippewa Falls, Wis., Herald-Telegram.

"Although I have pursued a career outside my major, the education I got at UW-Stout has been invaluable," said Polzin. "It was at Stout that I

tried my hand at news and feature writing and editing—skills that are very important in public relations. And, it's amazing how the seemingly unrelated classes such as food science have been put to use for clients involved in the food and beverage processing industries."

Polzin

Polzin advises students and recent graduates planning a similar career to take advantage of all career-related learning opportunities.

"Finding innovative ways to get early experience in your chosen career is very important," said Polzin. "I'm impressed when job candidates can explain how their experience can work for my agency. And I always look for someone who understands general business principles as well as the "how to" part of the job."

Polzin has been fortunate enough to have a professional career that incorporates her personal interests of traveling, learning new things and meeting new people.

"Luckily, my job involves all three," said Polzin. "In the last couple of years, I've expanded my horizons by taking downhill ski lessons, learning about football and other active pursuits."

Kids become hotel employees for a day

by Sean Scallion

Boyceville Deb Bell's third grade class at Tiffany Creek Elementary School in Boyceville, Wis., became hotel employees for a day at the Red Roof Inn hotel in Woodbury, Minn., last May.

When they arrived at the Red Roof Inn, five stations had been set up by Lisa Lybert, general manager of the hotel. These were housekeeping, laundry, front desk and management. Every aspect of the motel was explored by the students in a general tour of the facilities. Then the students went to work.

"We had them teamed up with our regular employees," Lybert said. "They learned how to use fax machines, set a payroll by using a computer, how to clean a hotel room, do laundry, etc. We also showed them videos on our marketing strategies and a history of Red Roof Inns."

Lybert said the students seemed very impressed with inner workings of a nationwide hotel chain and she hoped that it will spark interest in some of them to think about careers in the hotel business.

"They enjoyed themselves very much," Lybert said. "When they came here, we handed out pairs of rubber gloves for them to use while they were at the house-cleaning station and they wanted to take them home with them. I heard from Mrs. Bell that many of the students expressed interest in getting into the hotel business when they got older."

The trip was a part of Red Roof Inn of Woodbury's "adoption" of the third grade class of Tiffany Creek. The idea for the hotel to "adopt" the class came from both Bell and Lybert together.

"I grew up in the Menomonie area and I went to UW-Stout with Mrs. Bell," Lybert said. "I've been in the hotel business for the past five years and I've always wanted to give something back to the community. I knew Mrs. Bell was a grade school teacher and we both felt that a program like this would have its benefits. It would get our employees working with kids and it would show the students all the many opportunities there are in the hotel field when they grow up."

Bell's goal is that every classroom at Tiffany Creek can be adopted by a business.

"The kids will get many valuable experiences from being employees for a day at a particular business," Bell said. "It teaches them how a business is run and opens doors to all sorts of possibilities for careers they can shoot for as they grow older. I'm hoping to convince many other employers in the area to do the same with other classrooms so they can have the kind of day we had at the Red Roof Inn."

Lybert graduated with a B.S. degree in general business administration in 1991. Bell received degrees in early childhood/elementary education in 1983 and professional development in 1991. As alumni, they felt it was a perfect partnership in education that they are hoping to continue annually.

In it for the long haul

Commitment name of the game for Stu North

By Loren Nelson, Leader-Telegram staff
Staff photo by Steve Kinderman

Taking golf lessons from Stu North is like eating a seven-course meal—both require a little extra time and a healthy appetite.

Unlike some golf instructors, North isn't interested in giving a 20-minute lesson to someone he'll probably never see again.

"I'm not teaching golf for the money it puts in my pocket," said the 72-year-old North. "I'm teaching golf for fun. And it only becomes fun when you can see the results of it."

"Every once in awhile, you get a pretty good golfer that gets where he or she wants to go and you feel pretty happy about that."

North's best and undoubtedly most famous pupil is his son, Andy. A winner of two U.S. Open titles, Andy North, 45, now works as a golf commentator for ESPN. He is also in the golf course design business.

Meanwhile, Stu, who spends his summers living north of New Auburn at Sand Lake, is still in the teaching business. He gives lessons every Wednesday at Hallie Golf Club during the summer. Every fall North and his wife, Mary, migrate to Gainesville, Fla., where Stu spends the winter teaching golf at the University of Florida.

"Stu is a person who stresses long-term commitment in the game," said Ed Severson, who along with his brother, John, are the head professionals at Hallie. "He loves to teach people who have aspirations to make golf a career. He

doesn't want to commit to working with somebody else unless they're going to make a commitment to the game."

Ed and John Severson hadn't reached their teens when they got their first lessons from North. Although both are now accomplished players who give lessons themselves, they still work with North in an attempt to sharpen their games.

"Whenever we get a chance, we're out there with him," John said.

As you would expect, there are no tricks or gimmicks to North's teaching style.

"In a way, it's kind of simplistic," John said. "He pretty much focuses on a full swing and getting all your body parts working together at the same time. He's not the type of guy who has 14 different tips."

A New Auburn native and former high school teacher and coach at Thorp and Tomah, North worked as a professor and administrator at the University of Wisconsin-Madison and University of Houston. Some of North's fondest memories are from his days as a basketball coach at Thorp.

"I was a basketball nut," he said. "Of course, I taught or coached them all, but basketball was the fun game because you can steal a basketball game."

"In football, about halfway through the season you know just about what you're going to do. In basketball, about halfway through the

Veteran teaching pro Stu North gives some valued lessons on golf and life to a young pupil at Hallie Golf Club.

season you start dreaming about how to steal two or three (games) to make it to the state tournament."

North, who coached John and Ed's father, Duke, while at Tomah, is working with his third generation of Seversons. Two of his regular students this summer are Ed's children, Holly and D.J.

"I work with people of every age, but it's fun if you get some kids with a little ability," North said.

A regular on the Chippewa Valley Golf Association's senior tournament circuit, North

says he also likes working with older players.

"I believe just because you're 60, you don't have to shoot a funny number," he said. "The good thing about golf is you shouldn't deteriorate as rapidly as most people do. In golf, as long as you can walk normally... you can play pretty respectable ball."

Stewart received a master's degree in industrial education, and Mary received a bachelor's degree in home economics education in 1946 from UW-Stout.

Fischer named Illinois special education teacher of the year

The Illinois Council for Exceptional Children (ICEC), the state affiliate of CEC (Council for Exceptional Children), the international organization of teachers, administrators and parents working for and with children who have special educational needs, has honored Murray K. Fisher, a 1974 graduate of industrial technology, with its "Clarissa Hug Teacher of the Year" award.

Fisher, of Morton Grove, Ill., currently teaches students who are severely and profoundly cognitively delayed, in a Chicago Public Elementary School. During his 20 years in education, Fisher has worked in the areas of vocational training, physical education, language development, staff development and educational materials design. He has served as inclusion facilitator, university instructor, educational consultant, educational facilities consultant, guest lecturer and school principal.

This varied background brings to his students educational experiences that are directly applicable to the world outside the

classroom. Reading and math are taken from the newspaper and the accompanying ads. Science involves the students in their environment in and out of the school building, while social studies and history are experienced through TV news reports, videos, role playing and discussions.

His students are bursting with desire to express what they are thinking, what they have seen and what they have done.

Fisher has the energy and ability to turn walking past a sunny window ledge into a lesson on heat absorption as well as shadows.

In addition to his teaching and direct services, he is also a never-tiring advocate for the education of children with special needs. He makes every effort to attend every meeting, conference, convention or speakers' forum to support, explain, defend or challenge ideas and efforts related to special education programs and children.

The "Clarissa Hug Teacher of the Year" award was presented at the Illinois Council for Exceptional Children's annual convention

in November. The convention includes three days of lectures, presentations, and seminars attended by special educators and parents of children with special needs from throughout Illinois.

West Bend students have careers at their fingertips

Paula Orth

Imagine a career counseling system that's available instantly, at the touch of a few buttons. Everything you need to know about a career—education, training, job prospects, lecture listings—is all in one place.

This is CareerNet.

CareerNet is an on-line information program that uses local information about career planning and, with an Internet connection, can make national and international information available to anyone in the West Bend area.

The service was developed by the Wisconsin Job Service, the West Bend High School and the Moraine Park Technical Institute, for use by middle- and high-school students, and adults.

Joe Fuehrer '71, industrial education, CareerNet director and a school teacher for 24 years, "never imagined we'd ever have anything like this."

"The information we're making available to people could come from West Bend, or from the other side of the world."

He added, "This is unique, because CareerNet doesn't have a physical location that people go to. We have terminals in various

places, and they access CareerNet through those. It's considerably less expensive, and the ongoing costs are minimal. And, we can operate on any server that has an Internet connection."

The system is accessible by computer modem, so anyone can access the information from school, work or home. "Anyone with access to the Internet's World Wide Web can utilize the CareerNet program," Fuehrer said. "We're located at <http://job.careernet.org>."

Before CareerNet, a student would go to an education aide, who would steer the student to various printed materials about careers. Gathering the information could take hours or days.

CareerNet makes the research process much faster, because it takes only a matter of minutes to research a specific career area.

Savings are realized because there is only one CareerNet office, where Fuehrer updates the information on a computer.

In the future, he said, CareerNet may become part of a video distance learning system. "We're looking at educating students from several schools at once," he explained. For example, instead of having teachers at three sites for three students, the program could offer comparable training, complete with teacher/student interaction, with one teacher videoconferencing with the other sites.

"The advent of the Information Superhighway makes projects like CareerNet available to everyone," says Joe Fuehrer, CareerNet director.

"The advent of the Information Superhighway makes projects like CareerNet available to everyone," Fuehrer said. "It's really amazing...and we're very proud of it."

Lekies receives Fulbright Scholarship

Kristi Lekies, a Ph.D. candidate at Iowa State University, has been awarded a Fulbright grant to study at the Institute for Applied Research on Childhood, Youth and the Family, at the University of Potsdam in Germany from August '95-July '96, the J. William Fulbright Scholarship Board and the United States Information Agency (USIA) announced recently.

Lekies earned her bachelor of science degree at UW-Madison, and her M.S. degree in home economics in 1993 at UW-Stout. While at UW-Stout, she received the UW-Stout Alumni Association Graduate Scholarship. She came to Iowa State University in 1993 to study family resource management, rural families and rural adolescents.

With an interest in rural youth in small communities, Lekies will be researching community resources and influences on the transition from adolescence to young adulthood while she is in Germany.

"I'm also interested in talking with experts in

human development and life span studies, and accessing inter-national research," Lekies said.

Upon her return to Iowa State, Lekies plans to complete her degree program and then will pursue a career in teaching and research with an international component.

Lekies is one of approximately 2,000 U.S. grantees who will travel abroad for the 1995-96 academic year under the Fulbright Program. Established in 1946 under Congressional legislation introduced by former Senator J. William Fulbright of Arkansas, the program is designed "to increase mutual understanding between the people of the United States and the people of other countries."

Lekies

Harnisch wins floral design program

Brad Harnisch, co-owner of Floral Expressions, Janesville, Wis., recently won the finale program at this year's American Institute of Floral Designers (AIFD) National Symposium in Chicago.

The AIFD, first established in 1965 to recognize and promote the art of floral design as a professional career, is considered the leading non-profit organization committed to establishing and maintaining standards in professional floral design.

Interest and involvement in the institute spans the globe, evident by the nearly one thousand worldwide designer members. Its annual national symposium is considered the world's foremost floral event.

The inspiring four-day educational symposium is a means for other florists to share ideas and design trends.

Harnisch's program, titled "Earth, Wind, Water, Fire: A Kaleidoscope of Natural Elements," offered floral interpretations of the four elements which make up the world in which we live.

"Its purpose was to enlighten other designers as to the awesome powers of nature — to inspire their creative energies and open their eyes to new design possibilities," Harnisch said.

A year of planning pre-empted the one-hour stage presentation. The program consisted of 28

Harnisch

floral interpretations, the largest being a seven-foot sphere of dried flowers.

Several companies donated products for the production including Avatar's World, an Edgerton company dealing in wholesale dried flowers. "The program received rave reviews," Harnisch said.

He dedicates the success of the event to his many industry friends for their help, and to his "dedicated group of co-workers at Floral Expressions and partner Magda Nelson for her support, enthusiasm and creative output."

ALUMNI REUNION 96
june 28 - june 29 1996
class of 1956
1966
1971
1976
1986

Rediscover Stout

Mark your calendar now to attend Reunion '96, June 28-29 at UW-Stout. Learn from outstanding Stout faculty, renew those great friendships and start some new ones. This is an important opportunity to reacquire and reinvolve yourself with the university and the friendships that began here.

All classes ending in 6 and 71, from the Class of 1956 to the Class of 1986, are invited to return to campus to celebrate their class reunions.

Reunion alumni will have the opportunity to become acquainted with UW-Stout and to recall their student days through seminars and lectures on current topics of interest, and tours of the campus, including the newly renovated Fryklund Hall.

In 1993, class reunions were changed from homecoming weekend to the summer. This change made dormitory space available and enabled more people to attend the reunions.

Further details will be mailed with registration forms by mid-April. If it's not your reunion year, don't feel left out. Reunion '96 is open to anyone interested in returning to UW-Stout.

Be sure to call roommates and college friends today to make plans to meet on campus in June.

Plan to attend Reunion 1996. Come alone, or bring your family; but come and reconnect. Reunion is fun.

Reunion Class Giving

What is a Reunion Class Gift?

Reunion class gifts raised \$29,000 of unrestricted funds to support the university. This year's goal, \$54,000 in unrestricted funds to support the university will provide benefits to students and faculty.

Of the total amount raised, half will go to fund the Chancellor's Honor Scholarships, which are awarded in the amount of \$1,000 to entering freshmen who are in the top 10 percent of their graduating class. The goal is to support 27 students with \$1,000 scholarships.

The other half will support the unrestricted dollars that provide funds for UW-Stout not accommodated by the university's budget, such as faculty development and faculty grants.

Who is included in the '96 Reunion Campaign?

Alumni who received their undergraduate degree in 1956, '66, '71, '76, or '86. The reunion gift is usually larger than an annual gift, to celebrate the reunion year. All gifts credited to the class since July 1, 1995, including:

- ▶ all unrestricted gifts to the university (*our highest priority*)
- ▶ gifts designated for specific purposes such as scholarships or memorial funds
- ▶ corporate matches generated by a personal gift to the university

What is the 1996 Reunion Gift Campaign?

Class Year	Goal	Number of Scholarships	Number of Class Members
1955	\$ 6,000	3	111
1965	\$10,000	5	301
1971	\$ 8,500	4	961
1975	\$13,500	7	835
1985	\$16,000	8	1198

When does the 1996 Reunion Gift Campaign end?

All gifts received from reunion years by June 30, 1996 are included in class totals. Class gifts, which include the Chancellor's scholarships, will be presented to Chancellor Charles W. Sorensen during the reunion luncheon.

How can I participate with my class?

Interested individuals are encouraged to contact their reunion committees or the Stout University Foundation, Inc., P.O. Box 790, Menomonie, WI 54751-0790, phone 715/232-1151.

Fall athletic wrap-up

Record-wise, the Blue Devil football team took a step backward, falling to 3-7 overall, but third-year coach Ed Meierkort was ready to get out of the blocks for the 1996 season a day after the 1995 season ended.

"Record-wise, obviously we are disappointed, but we are not disappointed in the direction of our program because all of our young players are coming back," Meierkort said.

Injuries played a big part in the Blue Devils' struggles as several starters went down throughout the year.

Offensive guard **Lewis Lindner** (Sr, *Loyal, Wis.*) and defensive lineman **Mike Olson** (Farmington, Minn.) were named as WSUC second team picks. Receiver **Matt Doke** (Jr, *Bruce, Wis.*), running back **Mike Bechtel** (Jr, *Augusta, Wis.*), linebacker **Nick Kaiser** (Sr, *Menomonie, Wis.*), linebacker **LaRue Pierce** (Jr, *Reddick, Fla.*), cornerback **Tony Aizupura** (Jr, *Reddick, Fla.*), and offensive linemen **Saxon Feeney** (Sr, *Plymouth, Minn.*) and **Joe Kanupke** (Sr, *Oak Lawn, Ill.*) were named honorable mention. Kaiser was a GTE/CoSIDA District V Academic All-American selection.

Bechtel was the team's leading rusher with 682 yards and returned two kickoffs for touchdowns. He also led the team in scoring with 56 points. Quarterback **Forrest Schneider** (Sr, *Red Wing, Minn.*) completed his career by becoming the second ranked passer in Stout history with 4992 total passing yards.

It was the year of the blocks for the Stout volleyball team as **Cassie Buxton** (Sr, *Edina, Minn.*) shattered five individual blocking records as the Blue Devils finished the season at 13-22. **Stacy Stoddard** (Fr, *St. Paul, Minn.*) also tied an individual match blocking record.

"It was a rebuilding year," third-year coach Jill Jolliff said, "but it gave us the chance for some of the players to get some playing time under their belts."

Megan Frazier (Jr, *Red Wing, Minn.*) was Stout's most effective offensive weapon, leading the team in kills, hitting percentage and digs as she was named to the WWIAC honorable mention squad as was **Jenny Kelley** (Sr, *Bloomington, Minn.*). Kelley was a hitter that moved to setter

after the starting setter was lost to a knee injury.

Women's soccer made its first appearance as a varsity sport, and coach Lisa Petrucci was pleased with the Blue Devils' 4-12-1 record.

"It was an extraordinary season," Petrucci said. "No one expected us to win a game."

Kari Stapleton (Jr, *Hartford, Wis.*) scored the Blue Devils' first-ever goal in a 2-1 loss to UW-Platteville and the Devils recorded their first win by downing Martin Luther, 3-1 on Sept. 23. Stout's first win over a conference opponent came in the WWIAC tournament when they downed UW-Superior, 2-1.

Joann Sognesand (Sr, *New Hope, Minn.*) was the Blue Devils leading scorer with four goals and **Jenny Tyson** (Sr, *Apple Valley, Minn.*) finished with three goals and two assists.

Andrea Schroeder (Sr, *New Berlin, Wis.*) was named to the WWIAC second team and played all positions for Stout throughout the season.

With a new coach, the Stout women's tennis team made some noise on the tennis scene as first-year coach Cyndi Raymond's team finished with a 9-2 overall record and placed fourth in the WWIAC.

Tami Weiss (So, *Cottage Grove, Minn.*) and **Kristine Erdtmann** (So, *Jesteburg, Germany*) took undefeated records into the conference meet before finishing third. Weiss finished at 13-1 and Erdtmann at 12-1.

The No. 3 doubles team of Weiss and **Jessica Pfeiffer** (So, *Woodbury, Minn.*) was second at the conference meet and the No. 1 doubles team of **Amy Jamieson** (So, *Dayton, Minn.*) and **Carrie Kish** (So, *Anoka, Minn.*) placed third.

The men's cross country team placed sixth at the WSUC meet and the women finished eighth. **Paul Gilles** (So, *Plum City, Wis.*) earned all-conference honors by placing 18th at the conference meet.

Craig Sandbulte (Jr, *Willmar, Minn.*), **Jason Petersohn** (So, *Manitowoc, Wis.*) and **Jason Waldvogel** (Jr, *Wausau, Wis.*) were other team leaders.

Katy Olson (Fr, *Rice Lake, Wis.*) and **Lisa Radosevich** (So, *Tomahawk, Wis.*) paced the women's team all season.

Five inducted into hall of fame

Speltz Johnson Peterson Vavra Halvorson-Schillinger

Five Stout outstanding athletes, four from the early 1980's, were inducted into the UW-Stout Hall of Fame in ceremonies Nov. 4.

Gymnast **Paul Speltz**, baseball player **Joe Vavra**, football player **Bob Johnson**, track athlete **Nanci Halvorson-Schillinger** and basketball player **Bill Peterson** entered the hallowed hall.

Speltz was a member of the final Stout men's gymnastics team that won the 1984 NAIA national championship, Stout's only team national championship team.

Speltz dominated the pommel horse, setting the school record in 1984 with a 9.65. He won the NAIA pommel horse title in 1983 and 1984 as well as the NCAA Division II pommel horse title in 1983. One of only three Stout gymnasts to ever earn a berth to the NCAA Division I championships, Speltz placed 20th in 1983.

"Winning the NAIA team championship is my biggest thrill," Speltz said. "I found winning as a team a rewarding change from individual accomplishments."

Originally from Rochester, Minn., Speltz is employed by Vikings Electronics as a project engineer and resides in Woodbury, Minn. Speltz and former teammate **Mark Rezac** have recently started a company to develop and market a device that adds fire sounds to gas fireplaces.

Vavra will be remembered as the most dominant shortstop in Stout baseball history. He was the Blue Devils' leading hitter in 1980, 81 and 82 and the team MVP in 1981 and 82, the same years he was named all-district. He was an honorable mention All-America selection in 1982.

Vavra appears in the top ten of six Stout career records, including the top batting average (.402), and ranks second and third in single season batting average, hitting .472 in 1981 and 82.

Vavra was drafted by the Los Angeles Dodgers in 1982 and worked his way through the farm system before illness took him off the playing field while playing AAA. Vavra stayed with the Dodgers as a coach, working at various levels in the farm system. In 1995, he was appointed the Dodger's major league base running coach. In 1989 and 1994, Vavra was named *Baseball America* magazine's "Short-A Season manager of the year."

Active in community events, Vavra yearly

holds a baseball clinic at Stout for area youth.

A native of Chippewa Falls, Vavra calls Menomonie his home during the off-season.

Johnson is the Blue Devils' all-time leading rusher, tallying 2656 yards from 1979-82. A two-time all-WSUC first team pick, Johnson holds career records in rushing attempts (571) and most net yards (2656). He holds season records for most rushing attempts (209) and most touchdowns (13).

Playing in 42 consecutive games, Johnson was the team MVP in 1981 and 82 and was a NAIA honorable mention selection in 1981.

"I would not trade the experience of playing Stout football for anything," Johnson said. "The friendships, the coaches, the winning attitudes."

Johnson is employed by LithoTechnical Services in Bloomington, Minn., where he has been named the salesman of the month 14 times. Formerly from Hastings, Minn., Johnson resides in Eagan, Minn.

Halvorson-Schillinger still holds four individual women's track records and is part of another as a member of a relay team, running for the Blue Devils in 1981-82.

Halvorson-Schillinger holds outdoor records in the 100- and 400-meter hurdles, the heptathlon and was a member of the 4 X 100-relay team. Indoors, she holds the pentathlon record.

A two-time Wisconsin state hurdle champ, Halvorson-Schillinger earned NAIA All-American honors in 1981, placing third in the 400 hurdles and fourth in the 100 hurdles.

She resides in Edgar, Wis., her hometown, and is employed by Kolbe and Kolbe in Wausau.

Peterson played a point guard position for the Blue Devils basketball team in 1940-43 and 46-47 before the term was even known.

Peterson, deceased, scored 410 career points, but dribbling was his forte. When the Blue Devils qualified to the NAIA Nationals in Kansas City in 1942, he won over fans with a solo dribbling exhibition that may have lasted four minutes during an opening 47-42 win over Texas Wesleyan.

Peterson was also a master of the look away pass. As did many students, Peterson joined the armed services during World War II, then returned to Stout after the war.

Blue Devil Spring Schedule

Friday, February 2

Wrestling vs. St. John's, 5 p.m.
Men's and Women's Track hosts
Burger King Invitational, 5 p.m.

NCAA Division III Nationals, TBA

*Wisconsin State University Conference Game.

Buelow receives award

The man responsible for establishing the university's sports information office, and a major player in the formation of the Athletic Hall of Fame, received the 1995 Stout Distinguished Service Athletic Award.

Charles Buelow, who served as director of University Relations from 1968 until his retirement in 1992, received the award at Hall of Fame ceremonies held Nov. 4.

Buelow was instrumental in developing what is now the Office of University Relations. The office oversees legislative relations, community

relations, business relations, universitywide publications, media relations and special projects for the chancellor.

It was out of that office that Buelow established the sports information office in 1968. Buelow functioned in a many-faceted capacity, serving as the sports information director until 1985.

Buelow also played a major role in establishing the Hall of Fame in 1978. In addition, he was pom pon adviser for many years.

The Distinguished Service Athletic Award is courtesy of M&I Bank.

Faculty Death

Mary K. Williams, 91, Nov. 10, Stoughton. She was an art teacher at Stout and at the Women's College of North Carolina for a number of years.

Past issues of Tower available

The UW-Stout Alumni Association has a limited surplus of issues of Tower yearbooks for the years 1944 to 1948 and 1953 to 1989.

The cost is \$10 per issue which includes shipping and handling. If you would like to purchase copies from those years, mail a check made payable to the UW-Stout Alumni Association with a note indicating the specific years you want to:

UW-Stout Alumni Association
P. O. Box 790,
Menomonie, WI 54751-0790.

Eggert publishes new book

James Eggert, who has taught Economics at UW-Stout since 1968, has published *A Cosmic Journey*, an introduction to cosmological and human evolution. Written in a friendly, non-intimidating narrative style, *A Cosmic Journey* celebrates our many pasts, while exploring age-old questions of human purpose and possibility and, above all, what it means to be "at home" in this vast and ever expanding universe.

Eggert has written three other books: *Meadowlark Economics*, *Invitation to Economics*, and *What is Economics?*

A Cosmic Journey is available at bookstores or direct from the distributor at 1 800/729-6423.

Eggert lives with his wife Pat and two children in the Colfax area.

UW-Stout Alumni Association

Gatherings

Friends reunite in Chicago

Former roommates and classmates reunited in Chicago July 14-18. Pictured are (l-r) Stephanie Hager '94, Milwaukee, Wis.; Lorie Muench Price '94, Eagan, Minn.; and Jeanne Fink '93, Chicago, Ill.

Jamaican Alums gather

Jamaican alumni met in July. Pictured (l-r) are: Dr. Heather Little-White BS '79, MS '80; Lana Francis '93; Jean Johnson '81; Margaret Bennett BS '77, MS '78; and Michael Boyd BS '82, MS '83.

Tour guides reunite

The First UW-Stout Tour Guide Reunion was held last June at Sherlock's Home in Minnetonka, Minn. Pictured here are: Kristine Webber-Peterson '86, Laura Gilbertson-Dirks '84, Brigid O'Malley '85, Joram McClurg '85, and Keith Okan '85. Missing were Larry Rogman '84 and Brenda Callies '86. To be placed on the calling list for next years event contact: Keith Okan, 3900 Plymouth Blvd. #316, Plymouth, MN 55446, 612/577-0407. We would love to hear from any past or present tour guides.

We're looking for lost alumni

If you have a current address for any of the following alumni, please share it with the Alumni Office at 715/232-1151.

Don't let your classmates miss out on Reunion '96.
